Professional Experience

Remote Frontend Web Developer, VIP Response.nl

2019 to Jul 2026

- **Developed** responsive HTML landing pages and email templates by converting marketing campaign designs into functional, cross-device experiences, enabling the successful execution of online campaigns.
- **Collaborated** closely with company stakeholders and marketing team to support digital advertising initiatives, leveraging AI-powered workflows with Claude Code, ChatGPT, and Lovable.dev to accelerate development and improve efficiency.
- **Delivered** high-impact campaign assets for large-scale digital marketing initiatives and A/B testing campaigns, supporting conversion optimization, audience engagement, and data-driven marketing performance.

Senior Frontend Web Developer, E-Communication LTD.

2015 to 2019

- **Developed** responsive, cross-browser web interfaces by converting PSD designs and custom concepts into production-ready HTML, CSS, JavaScript, and jQuery, establishing a strong foundation in front-end development.
- **Led** multiple concurrent client projects while collaborating with cross-functional teams, earning a promotion to **Lead Frontend Developer** after consistently delivering high-quality work and demonstrating technical leadership.
- **Integrated** front-end applications with back-end functionality by assisting in PHP and JavaScript development, ensuring seamless functionality between user interfaces and server-side systems.

Junior Frontend Web Developer, E-Communication LTD.

2014 to 2015

- **Developed** responsive HTML interfaces by converting client-provided PSD designs into functional web pages, delivering accurate, production-ready front-end implementations.
- **Built** and maintained scalable web application features using PHP, JavaScript, jQuery, and AJAX, contributing to system enhancements and interactive functionality for multiple client projects.
- **Designed** and integrated small-scale databases into existing client systems, supporting back-end functionality while gaining hands-on experience in full-stack web development.

Technology Stack

Projects

Las Piñas Baptist Educational Ministry (LPBEM) Website

Role: Full-Stack Web Developer

Developed the official website for Las Piñas Baptist Educational Ministry, creating a modern, responsive platform that showcases the school's programs, admissions, news, and community initiatives. Built with a mobile-first approach, the website emphasizes performance, accessibility, and ease of content management while providing an engaging experience across all devices.

Technologies: HTML5 • CSS3 • JavaScript • jQuery • PHP • Responsive Web Design

Project URL: <https://lpbem.com/>
